

**Applicable Projects**

**Oil and Gas Experience**

Moxa Arch Area Gas  
Development EIS, Wyoming

Hiawatha Gas Development  
EIS, Colorado / Wyoming

Brundage Canyon Infill  
Development Project EA, Utah

Lake Canyon Exploration and  
Development EA, Utah

Big Porcupine CBM Project  
EA, Thunder Basin National  
Grassland, Wyoming

Rogers Pass Deep Exploratory  
Gas Well Permitting Support,  
Rocky Mountain Front,  
Montana

Grasslands Pipeline FERC  
Environmental Report,  
Wyoming-Montana-North  
Dakota

Phase I Site Assessment and  
Environmental Constraints  
Evaluations for Oil and Gas  
Acquisitions, Utah, Wyoming,  
and Colorado

Acting CBM Federal  
Permitting Coordinator, Large  
Independent Producer, Powder  
River Basin, Wyoming

Roan Plateau Oil and Gas  
Development Draft EIS  
Industry Comments, Piceance  
Basin, Colorado

Industry Project to Avoid  
Listing of the Greater Sage-  
grouse as a Threatened or  
Endangered Species, Rocky  
Mountain West

Mr. Fetzer brings 13 years of prior experience in oil and gas exploration to his current work in regulatory compliance and permitting. He has worked in a project management capacity for a number of Rocky Mountain independent oil and gas producers. His project background includes work with the Bureau of Land Management, the U.S. Forest Service, Federal Energy Regulatory Commission, Bureau of Indian Affairs, and numerous state and local regulators throughout the Rocky Mountain region. Professional experience has included management of NEPA compliance projects, contribution to jurisdictional and non-jurisdictional pipelines, various aspects of oil and gas permitting (including acting as the federal permitting coordinator for an active Powder River Basing CBM producer), and supporting oil and gas industry groups in achieving favorable outcomes from major programmatic NEPA projects and assisting in preventing unwarranted listing of animals to the U.S. Fish and Wildlife Service's Threatened and Endangered Species list.

Mr. Fetzer is experienced in the development of detailed schedules used to create realistic timelines and cost projections for major regulatory compliance projects. Utilization of such schedules, developed with project management software, permits careful tracking of expenditures, avoids missing deadlines, and facilitates active participation by all project stakeholders.

Prior to his environmental compliance career, Mr. Fetzer was a petroleum explorationist active in the interior Gulf Coast, West Texas, Michigan and Illinois basins and Rocky Mountains.

Mr. Fetzer is a 30-year member of the American Association of Petroleum Geologists and a member of the Rocky Mountain Association of Geologists. He has given presentations relating to project management strategies and CBM water management.

**Education and Certification**

BS and MS Degrees, Geology  
Ohio State University

Licensed Professional Geologist  
Washington and Utah
